## PRODUCT DETAILS

The DAB 251T is a rugged cast iron, twin impeller, self-priming, surface mounted jet pump suitable for use in a wide range of applications and especially where there is the requirement to lift water from the source.

The distinctive front casting contains a jet and venturi which provides suction capability of up to 8m.

Proven over many years the DAB 251T is embodiment of a 'Dependable DAB'.

## APPLICATIONS

- Supplying water to domestic installations
- Ideal for use in small-scale agriculture or horticulture
- Pressure boosting, irrigation, wash down or other limited industrial services
- Situations where self priming operation is necessary
- Designed for pumping from tanks, rivers and dams where air bubbles or small particles of sand are present

## FEATURES

- Self priming centrifugal pump with excellent suction capability
- 230V or 400V three phase TEFC motor with in-built auto reset thermal overload to prevent pump from damage

To protect the pump from excessive cycling and to isolate from the effects of water hammer, adding a pressure tank to the system is highly recommended
