PRODUCT DETAILS

Short, compact and powerful, the EAL10R rechargeable lantern delivers versatile lighting in a format about half the height of a traditional lantern.

Room-filling light shines in six modes — MoonGlow™, Warm, Low, High, Red, and Red flashing—to give you plenty of options

Press and hold the power switch for red anti-glare options that are ideal for reading at night or to make an emergency signal.

The EAL10R has a threaded tripod mount hole in the base, or for overhead light, remove the polycarbonate diffuser to reveal the ultra-bright LED globe inside then hang the lantern upside-down from the integrated carabiner.

5 YEAR WARRANTY

IP54
